

The "SB" Switch Box Lift Control System

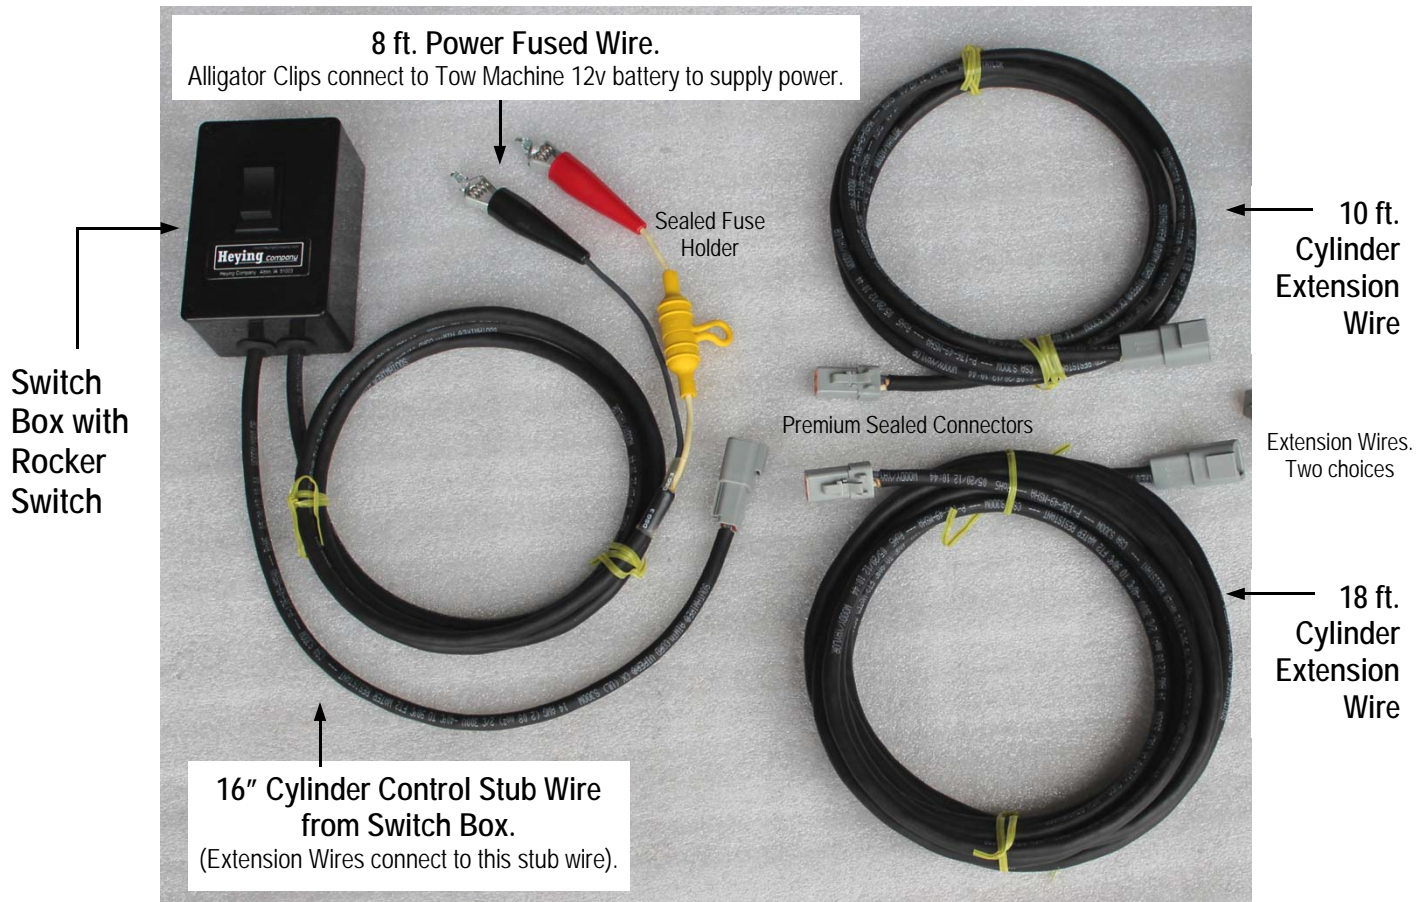

Can be used as a primary (everyday) operator lift control system, or, as an optional backup to other operator lift control systems.

Uses 12 volt Battery Power from user's Tow Machine!

The "sb" Switch Box Operator Lift Control System

Corded "Switch Box" Controller

Two Choices of Cylinder Extension Wires (18 ft. and 10 ft.) for operator convenience.

"SB" (Switch Box) Operator Lift Control System:

- Convenience of Electric Lift.
- Versatility to quickly switch to a different tow machine.
- Two "Cylinder Extension Wires" included (18 ft. and 10 ft.).

(User chooses which extension wire they wish to use. The 18 ft. Extension Wire often used for longer tow machines such as Gators/UTV's. The 10 ft. Extension Wire often used for shorter tow machines such as Garden Tractors/ATV's).

- Ability to be used as a primary (everyday) lift control system or as a backup to other operator lift control systems (used when needed).
