

Spartan Field Finisher

Infields

SF88 Tongue Towed
SF88 Direct Mount Quick Attach

Productivity Performance

Features:

Finisher Implement locks into position to ensure leveling takes place (does not float).

Floating implements do not level!

Flared ends for edgeless - seamless paths.

Great for all infields and pro-level type top surface infield conditioners.

“Quick Drop Off” implements make it easy to convert. True Multi Purpose Groomer.

See optional attachments.

88” wide models (Tongue Towed & Quick Attach).

Optional Spring Tines (Aerate & Pulverize).

Optional Vibrator (Releases Material from Finisher when grooming moist infields).

5 Different Lift Systems (Tongue Towed Models).

No Air - No Flat wheels (Tongue Towed Models).

Numerous optional attachments.

Levels & Smoothens Infields.

Produces a great infield finish. Ideal for infields topped off with pro style infield conditioners. Leveling Finisher Implement has flared ends for a seamless finish. Easy to use.

Pull with your choice of tow vehicles.

QAS

Quick Attach Swivel QAS shown with optional Front Tines.

Need to travel from one location to another?

Makes Travel Easier

Patent Pending

Convenience

“Quick Attach Swivel”™ Field Finisher

Direct Mount Quick Attach Swivel models connect directly to the rear of tow vehicles. Groomer has no wheels, no frame, no tongue. Simply lift it when traveling from one location to another.

72” wide and 84” wide models available. Connects and disconnects (to tow vehicle) in less than 60 seconds.

Mounts on vehicles with 1.25” or 2.00” rear receiver hitches and 3 Pt. Lift for sub compact Tractors.

Performance meets Convenience.

“Quick Attach Swivel” QAS™

Spartan Field Finisher

Making Infields Smooth is Easy.

*Leveling Them is the Hard Part. The Field Finisher levels and smoothens infields and leaves a professional surface. Great for top surface conditioners. Easy to Use. Optional Vibrator helps sift moist infield material from Finisher. Optional Spring Tines for Aerating and Pulverizing. **“Levels and Smoothens Infields”.***

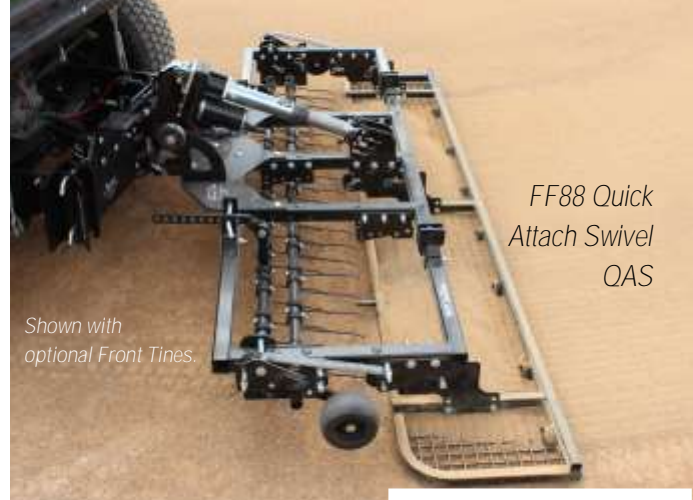

Vibrator Releasing Moist Material

Competitors tell customers their Finishers should be used when infields are dry. Why? Because all wire type Finishers on the market will cake full of material when grooming moist infields. This requires the user to remove the material from the

Finisher by hand...which is not convenient. We have the answer.

We are the only company that offers an optional Vibrator.

Vibrates material from Finisher when grooming moist infields.

FF88 Quick Attach Swivel QAS

Shown with optional Front Tines.

Shown with optional Front Tines and Rear Vibrator.

Tines Aerate & Pulverize

For those who need the convenience of “easy travel” our direct mounted “Quick Attach” models remove the burden of tongue towing a groomer or having to trailer it to go from one location to another.

“Quick Attach Swivel” QAS. Our Rear mount “Quick Attach Swivel” groomers connect and disconnect in less than 60 seconds. You can still use your tow vehicle for other uses. When it’s “grooming time” attaching the groomer is quick & easy.

Rear mount “Quick Attach Swivel” groomers swivel when you groom to create a nicer finish. Most competitor rear attached groomers are rigid when grooming (they don’t swivel) and they can’t produce the same finish. We’ve combined rear quick attached and swivel technology that no competitor has accomplished.... it’s an engineering feat only mastered by Heying Company.

Swivels When You Groom

Why This Groomer? Easy to use. Lower Cost. Great finish for professionals all the way down to little leagues. Use on all infield materials - even top layered conditioners. Quick Drop Off Implements.

If you’re not “leveling your infields” you’re not grooming.

Properly preparing infields starts with the leveling process. Many tools can smoothen infields, very few tools can level them. Heying Infield Groomers Will Level Infields.

Helping Those Who Help Others Play!
Give Them the Playing Surface They Deserve.
